## SENIOR WATER RESOURCES ENGINEER

The Southeastern Wisconsin Regional Planning Commission (SEWRPC), the regional planning agency for the seven county greater Milwaukee area, has an immediate opening for a senior civil engineer with an interest in stormwater and floodplain management analysis and planning. The Commission is a leader in the application of state-of-the art approaches to the solution of water resources problems. This is an excellent opportunity for a senior engineer interested in working on a team utilizing cutting edge hydrologic, hydraulic, and water quality modeling techniques.

Responsibilities include the preparation of flood hazard maps and systems level plans, including computer modeling of hydrologic, hydraulic and water quality processes, supervision of junior staff, and assistance to local units of government in the areas of stormwater and floodplain management.

A minimum of 10 years of experience is required for the position along with a bachelor's degree in civil engineering, with an emphasis in hydrology and hydraulics, and the ability to effectively communicate orally and in writing. A master's degree and experience with water resources-related computer modeling and GIS is desirable.

Please submit a cover letter and resume by August 30, 2019, to: Elizabeth Larsen, Assistant Director, SEWRPC, W239 N1812 Rockwood Dr., P.O. Box 1607, Waukesha, WI 53187. Phone: 262-547-6721, E-mail: [elarsen@sewrpc.org](mailto:elarsen@sewrpc.org) Website: [www.sewrpc.org](http://www.sewrpc.org)
