

Transportation Modeling Manager

Ohio – Kentucky – Indiana Regional Council of Governments is seeking a qualified travel demand model manager to lead the development and application of the agency's regional travel demand forecasting model. The agency's current model is a four-step travel demand model with an emission estimation module. An Activity-Based model is under development and the successful candidate will lead a team of technical professionals in this effort. Qualifications: Master's degree Civil Engineering, Urban Planning, or related field. A Bachelor's Degree and extensive experience with travel demand modeling may be substituted for the Master's degree requirement. OKI seeks candidates with at least five years experience in travel demand modeling with two years of supervisory or management experience. Starting salary range: \$85k – 105k; commensurate with experience. Submit **resumes and salary requirements** to Nicole Hartman, Human Resources Manager, nhartman@oki.org by November 30, 2018. EOE – M/F
